

MRA Issue Form

Raising a MIF: When completing this form please refer to [MAP17](#) and provide as much detail about the Issue and/or Solution as possible to assist IREG or GDEG in their review. This form can include a high-level problem which requires consideration through to a detailed solution.

MRA Issue Reference	Date Issued	Version Number
MIF310	2 nd December 2019	1.0

Issue Title
Automating the DCC Flag in the Export MPAN process in ECOES

Summary of Issue
<i>MAP 28 (introduced in February 2019) requires that, where an export meter is registered to the DCC, an export MPAN Should be generated. At present, users are required to look for this information. The information is already held with ECOES and could be automatically populated in the request.</i>

<i>MAP28 The Procedure for Requesting Additional Import / Export MPANs using ECOES2</i>

Issue Details

Description of issue
<i>The ECOES2 solution that supports Suppliers requesting Export MPANs (which was introduced as part of a suite of changes to facilitate the creation/generation of new export MPANs for generation sites with smart meters installed), involves a number of checks to support the process. One of these checks relates to the registration of the site with the DCC. At present, this is a manual check but, as this information is currently held within ECOES2, it could be auto-populated on to the request screen to make the process more efficient for all parties.</i>
<i>C & C have reviewed the proposal and agree that the change could easily be incorporated into the existing solution at Minimal cost to parties (approximately £Xk).</i>

Impact of issue
<i>This proposal will automatically populate a DCC flag against the Export MPAN request, which should make the process more efficient for all parties.</i>

Potential Solution(s) (optional)

Solution(s)
<i>Please provide details for your proposed solution. Please provide red-lining e.g. any legal drafting, and revisions to data flows etc. as an appendix.</i>

Proposed Implementation Date
